TeaMate

STAINLESS

Hot Drinks on the Move

You are out at sea, it's cold, overcast and raining. Those with you are getting tired, dehydrated and moral is running low. What everybody needs is a hot drink to boost spirits and get the banter rolling again.

The new 316 stainless steel cased 'TeaMate' water boiler has been developed specifically for the marine industry where high levels of corrosion are present from salt laden air.

By fitting a 'TeaMate' water boiler, crews can make themselves a hot drink to keep warm and hydrated, therefore maximising concentration and keeping fatigue to a minimum.

Whispaire has created a range of small self contained water boilers to suit different applications. DC battery power, standard or covered tap, constant hot water or 'One Shot' single boil operation, manual or AutoFill* - you choose.

Designed and built to the highest standards throughout, 'TeaMate' will provide years of service with full factory support.

Unit 39 Romsey Industrial Estate, Greatbridge Road, Romsey, Hants. SO51 0HR

OVERVIEW

The '**TeaMate**' boiler is a small robustly constructed piece of equipment now fitted as standard by many authorities and private sector companies who realise that higher productivity is gained from staff whose well being and working environment has been considered as well as the ability to get the job done.

The stand alone unit holds enough boiling water to make 9 mugs or 14 plastic cups of tea.

HEAVY DUTY CONSTRUCTION

Internal tank of marine grade 316 stainless steel for long life. Outer case 316 marine grade stainless steel for maximum corrosion resistance and high quality appearance.

Superior components used throughout to give long life and trouble free use.

High grade insulation to give good thermal properties.

FEATURES

- 2.5 Litre capacity
- Full thermostatic control
- Safety screw filler cap
- Heating and Ready lamps
- Low water warning lamp
- Element switch off at low water level
- Stainless steel tank and case
- Plug in electrical connection

EASE OF USE

'Tell tale' LED's advise mode of operation:

Yellow - Add water

Red - Heating

Green - Ready for use

Heating element automatically cycles on/off to maintain pre-set temperature level

SAFETY FEATURES

Screw on vented filler cap prevents risk of scalding in the event of roll over accident

Constant water level monitoring prevents boil dry problems

Reverse polarity protection

Self closing tap cannot be left on

Optional tap guard

SIMPLE INSTALLATION

Simple four bolt wall fixing and plug in electrical connection makes installation simplicity itself. Mating half connector supplied so no additional components to source (excludes cable).

Available as an AutoFill version for plumbing into existing pressurised or unpressurised systems.

TECHNICAL DATA

Voltage:	12v or 24v DC
Power:	400W - 12v or 24v DC 800W - 24v DC
Boiling time: (with full tank)	35 mins - 400W 17 mins - 800W
Cable required:	10mm ² pos. / neg
Power consumption:	33A - 12v 17A - 24v 400W 33A - 24v 800W
Overall size:	325h x 230d x 200w
Weight:	5.2kg Empty 7.7kg Full

OPTIONS AVAILABLE

- Standard
- Standard with Tap guard
- 'One Shot'
- 'One Shot' with tap guard
- Tethered filler cap

All models available in all voltages

* AutoFill and One Shot options not available together
